

Introduction to Blockchain Technology

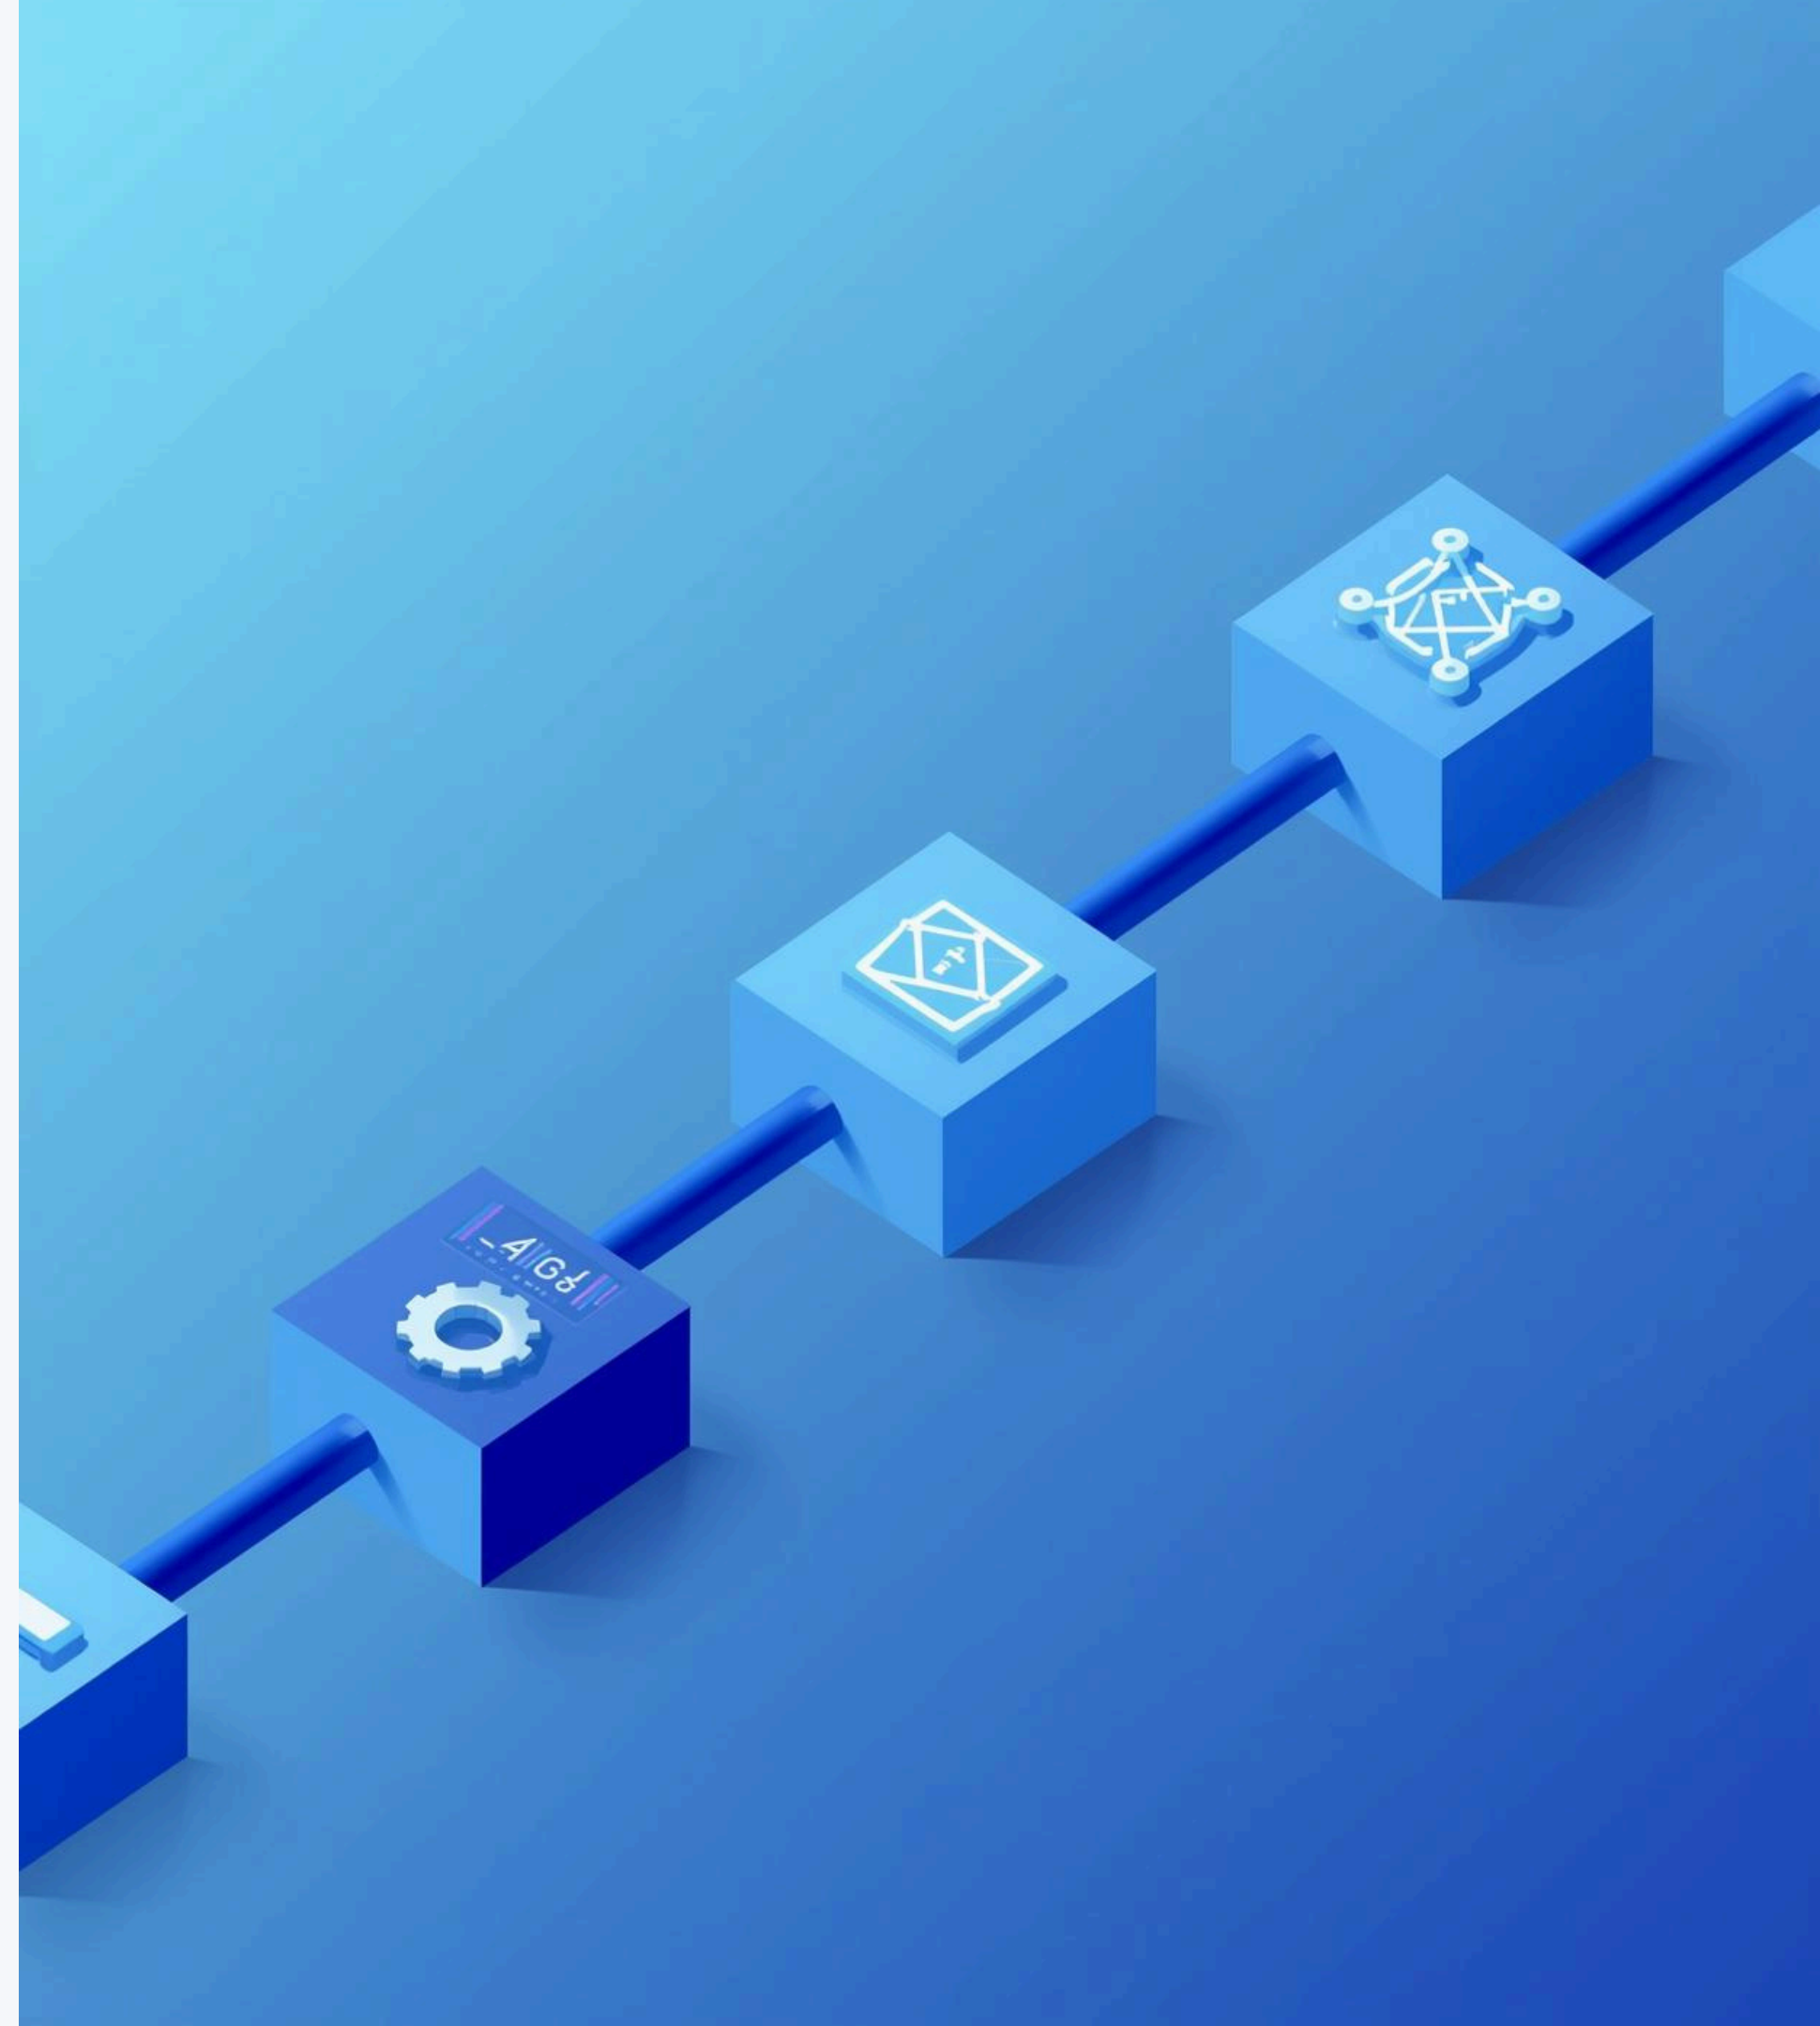

A modern approach to decentralized
systems

Presented by [DIMS - MERN]

What is Blockchain?

- **Distributed** ledger across multiple nodes
- **Immutable** records that cannot be altered
- **Secure** transactions through cryptographic methods

History

2008

**Launch of Bitcoin,
the first
cryptocurrency**

Introduced
decentralization and
blockchain
technology

2015

**Ethereum
Revolutionizes
Smart Contracts
and DApps**

Enabled
programmability on
the blockchain
platform

2017

**Rise of Smart
Contracts and
Decentralization**

Increased use cases
in various industries

2020

**Growth of
Enterprise
Blockchain
Solutions**

Companies began
adopting blockchain
for efficiency

2023

**Mainstream
Adoption of
Blockchain
Technology**

Widespread
implementation
across diverse
sectors

Technologies Used in Local

- Ganache - Local Blockchain
- Truffle - Smart Contract Development
- MetaMask - Wallet Connection
- Web3.js, Ethers.js - Blockchain Communication

(Decentralized File Storage - IPFS)

Blockchain: Validating

The reliable and secure way to get things done, from the rain of the wild business incitation to the future. The blockchain is a distributed ledger technology that allows for secure and transparent transactions.

Blockchain in Real-World Environments

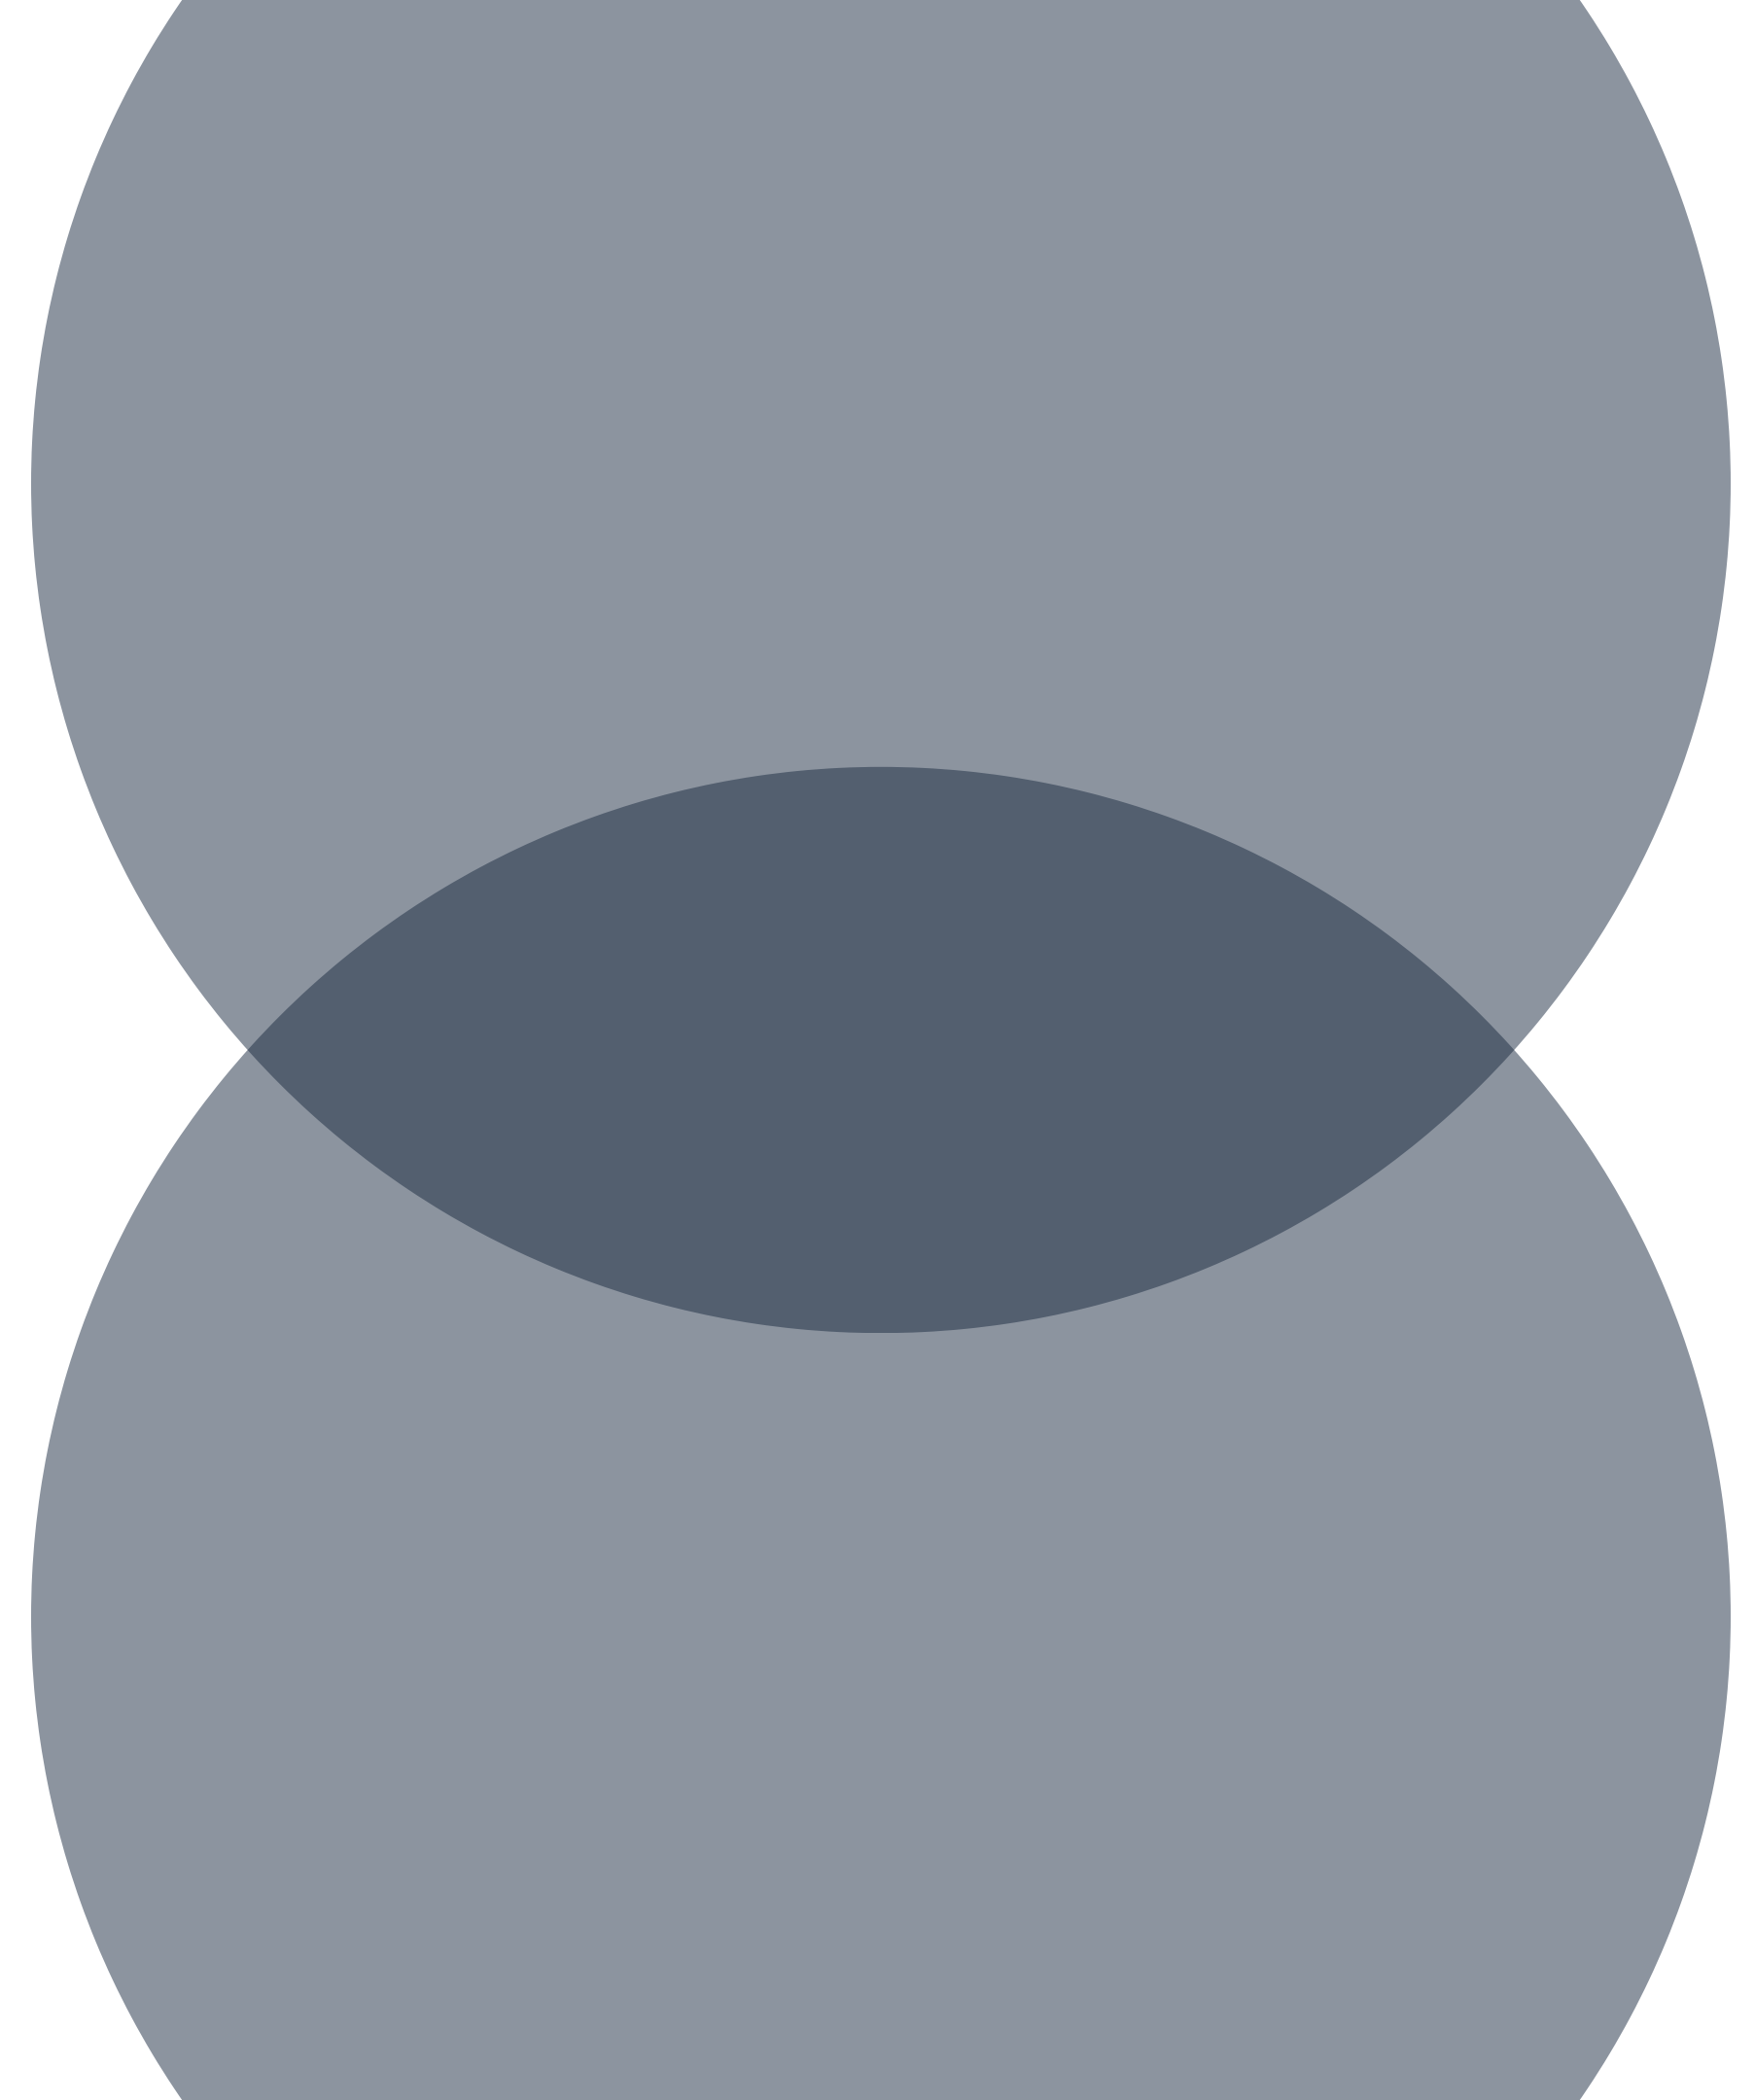

In real-world scenarios, Ganache is replaced by public testnets or the mainnet for actual deployment.

Testnets (Used for Simulation)

- Safe public networks for deployment trials.

Mainnet (Real Blockchain Network)

- Real deployment and user interaction with actual cryptocurrencies.

Key Features

- Decentralization
- Immutability
- Transparency
- Security

Applications of Blockchain

- Finance
- Supply Chain
- Healthcare
- NFTs

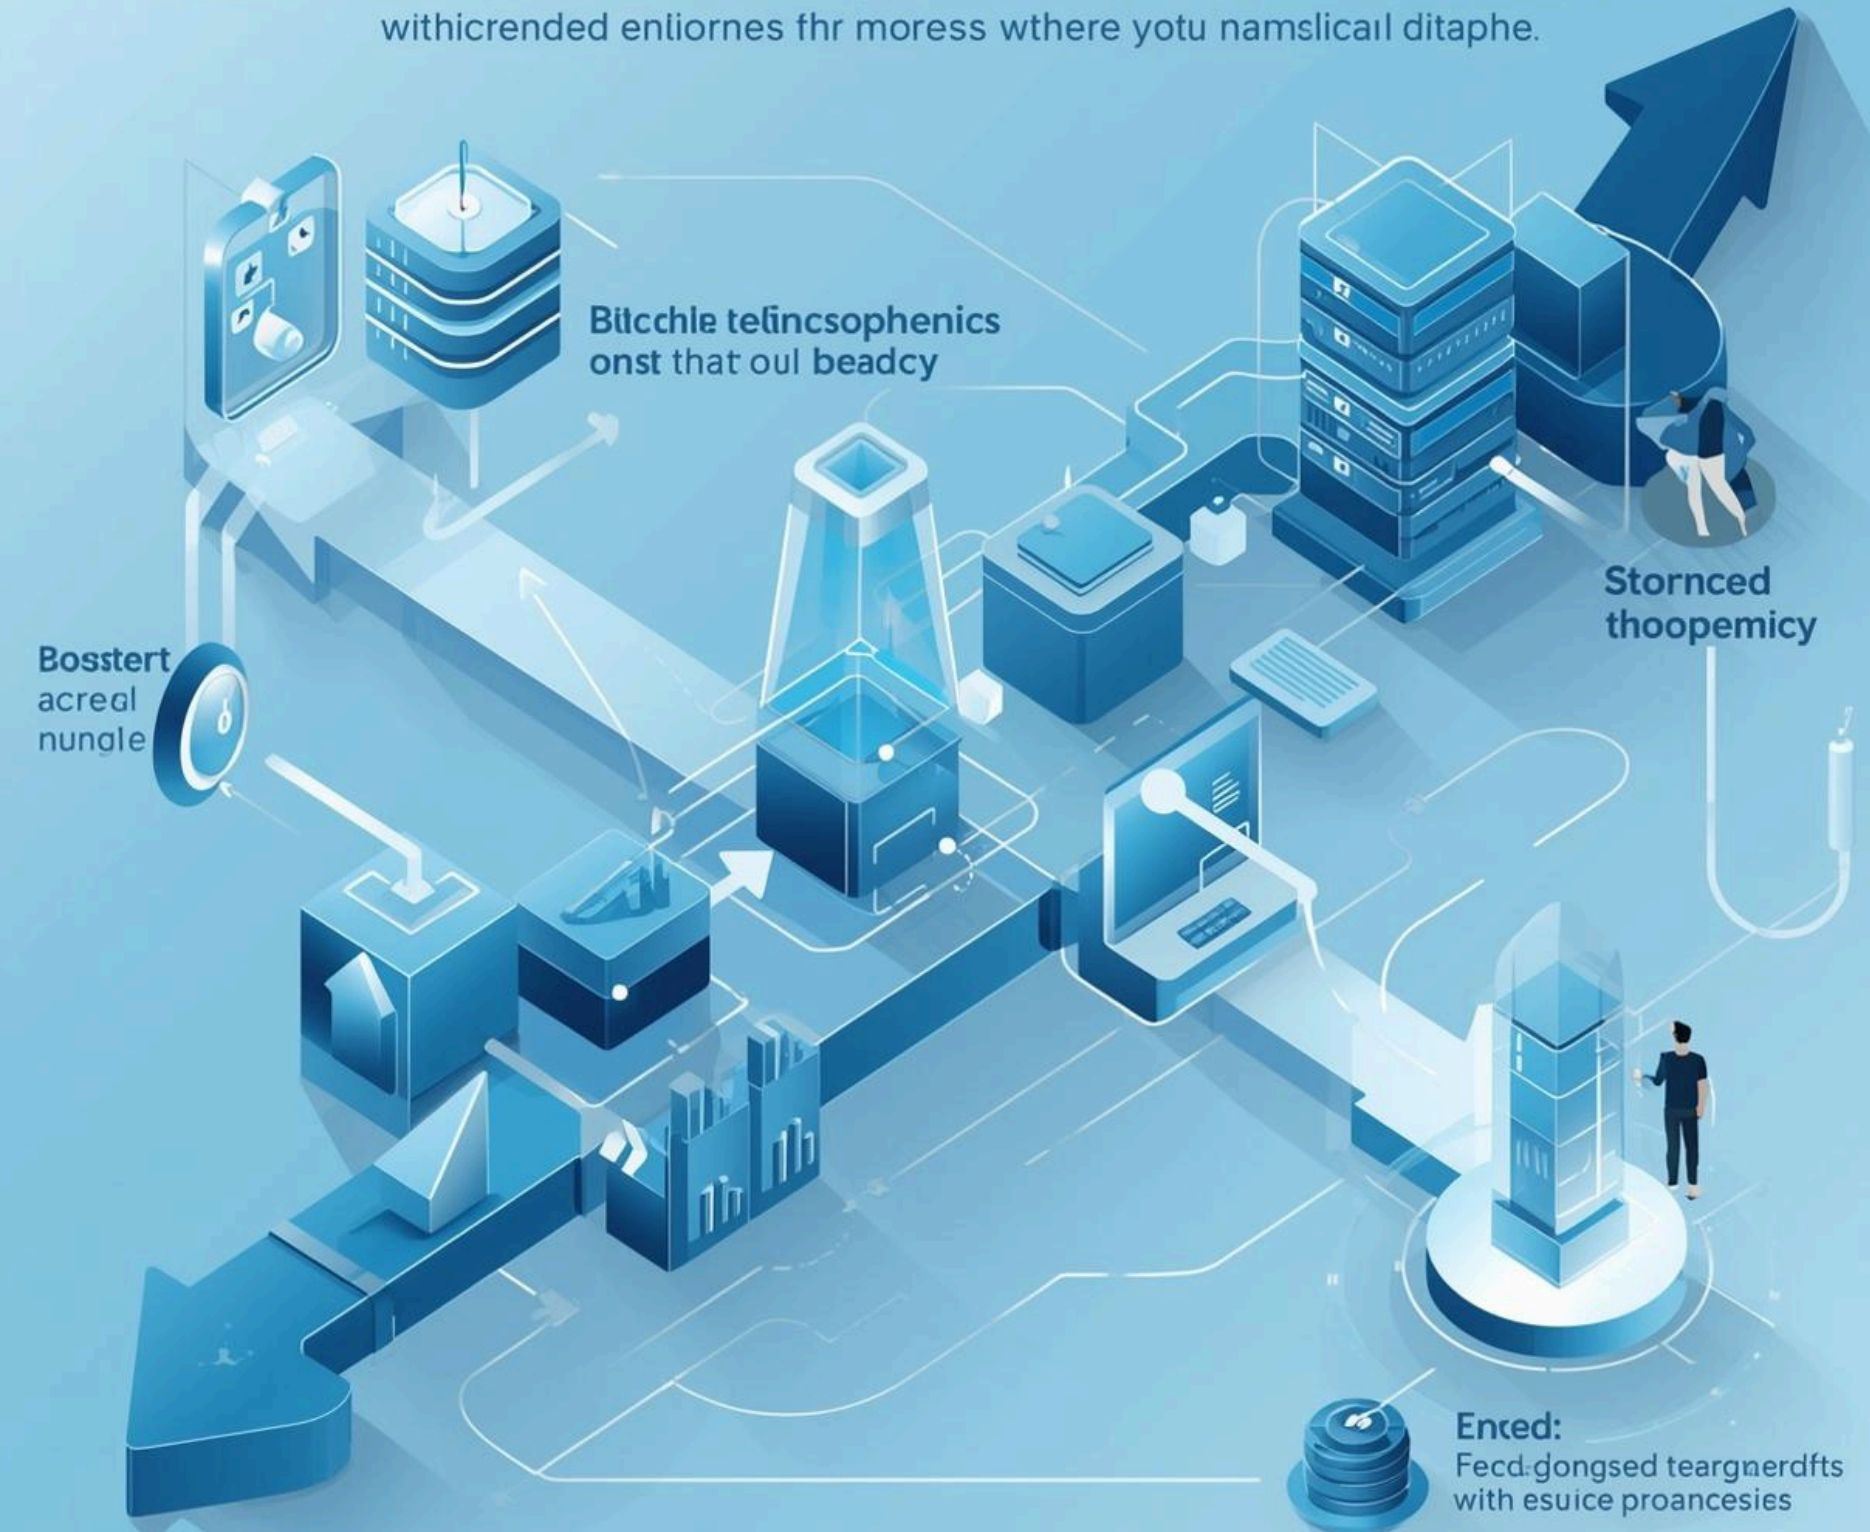

Benefits of Blockchain

- Enhanced **security** through cryptography
- Increased **efficiency** in transactions and processes
- Fostered **trust** among participants
- Significant **cost reduction** in operations

Blockchain anilerinst

The blocklichaliniing would inava for efficienting oretstioking and cosee withable tat extects on no ncnd therestand na sandent, anficking proceet, and ed hay elicctiony argening one artumt, withicrended enliornes fhr moress wthere yotu namslicail ditaphe.
